SUMMARY

Computer Engineering undergraduate (Class of 2027) with a strong foundation in data structures, algorithms, object-oriented design, and operating systems. Full-stack developer experienced in building scalable, distributed web applications (REST APIs, caching with Redis, database design).

EDUCATION

Bachelor of Technology, Computer Engineering — CGPA: 7.96

MIT ADT University, Pune, India

2023 – Present

Higher Secondary Education (11th & 12th Grade)

Bhavans College, Mumbai, India

June 2021 – May 2023

CORE COMPUTER SCIENCE FUNDAMENTALS

- Data Structures & Algorithms • Complexity Analysis • Object-Oriented Design • Operating Systems • Computer Networks

TECHNICAL SKILLS

- **Languages:** C++ (Proficient), JavaScript (Good), Python (Decent), HTML, CSS
- **Backend & Systems:** Node.js, Express.js, REST APIs, JWT Authentication, MongoDB, Mongoose, Redis (caching)
- **Frontend:** React.js, Vite, Tailwind CSS, Bootstrap
- **AI / Gen AI:** Google Gemini API, AI-Assisted Debugging
- **Tools & Platforms:** Git, GitHub, Postman, VS Code, Cloudinary, Vercel

PROJECTS

CodeWise — Coding Platform (*React.js, Node.js, Express.js, MongoDB, JWT, Cloudinary, Gemini API, Redis*)

- Built a full-stack platform for practicing algorithms and interview prep with an in-browser Monaco (VS Code style) editor.
- Enabled code compilation and execution across 4 programming languages via the JDoodle Compiler API, supporting concurrent submissions.
- Used Redis for caching to reduce database load and improve response latency under repeated queries.
- Integrated Google Gemini API to power an AI assistant giving hints, debugging help, and logic explanations.
- Tested with 5-10 users during development to validate usability and gather feedback on performance.

[Live Demo → code-wise-tawny.vercel.app](#)

TaskFlow — Task Management Web Application (*React.js, Vite, Node.js, Express.js, MongoDB*)

- Built a task-management web application for creating, editing, and tracking tasks with a clean, intuitive interface.
- Designed and implemented RESTful APIs for task operations, backed by MongoDB for persistent storage.
- Built a responsive frontend using React and Vite for fast load times and smooth interactivity.

[Live Demo → taskflow-gules-alpha.vercel.app](#)

STRIKE — Modern Frontend Website (*HTML, CSS*)

- Built a fully responsive, visually polished website using only HTML and CSS as part of a frontend-focused hackathon.
- Applied modern design principles, smooth animations, and clean layouts without relying on JavaScript.

ACHIEVEMENTS

- Solved 200+ Data Structures & Algorithms problems across LeetCode and GeeksforGeeks.
- Achieved a LeetCode rating of 1400+.
- Achieved a LeetCode both 100 and 50 days of code badges.
